PINTLE MOUNT: PM 58/90

Based on the same high performance weapon recoil technology as used in the Trackfire Remote Weapon Station (RWS), the family of Saab's Pintle Mount & Buffered Mounts delivers pinpoint accuracy where it is need most.

Reduced recoil equates to an undisturbed sight picture, providing the Operator with a consistent view of the fall of shot and target effects. Increased accuracy ensures a reduction in ammunition usage whilst minimising collateral damage risks.

The PM58/90 Pintle Mount allows for the integration of a 7.62mm MAG-58 or a 5.56mm M249 machine gun. A standard weapon mount interface is used to ensure deployability across a wide range of platforms

The Pintle Mount features a spare barrel holder with up to 4 boxes of ready to use ammunition (1 000 rounds of 7.62mm typical).

TECHNICAL DATA:

Features:

- Unique, highly repeatable weapon fixing (patent pending)
- Stable sight picture during firing
- Constant recoil mitigation through all elevation arcs
- Spare barrel holder
- Multi-weapon capability

Dimensions (PM58/90 typical):

- Weight (Pintle Mount MAG-58, Buffered Mount, spare barrel holder, ammunition box ready rounds holders) ~30kg
- Height:
 - Pintle Mount: ~1030mm (height configurable)
 - Buffered Mount: ~290mm

Options:

- Complimentary Non-Lethal Effects (smoke/obscurant, Bright White Light, Laser Dazzler/Pointer)
- Aiming interfaces
- Spare barrel holders
- Extended capacity ready rounds bins
- Gunner Protection Plate (GPP)

Other PM mounting options:

- M2 Heavy Machine Gun (HMG)
- 40mm Automatic Grenade Launcher (AGL) / Grenade Machine Gun (GMG)
- PKM
- NSV Heavy Machine Gun (HMG)
- AGS17/AGS30 Automatic Grenade Launcher
